

ASSA ABLOY and mindful MATERIALS

ASSA ABLOY
Opening Solutions

The global leader in
door opening solutions

mindful MATERIALS (mM) is a free platform with aggregated information on human health and environmental impacts for products from leading manufacturers, vetted by experts passionate about making it easier to make informed product choices.

If we change the way products are made and the way buildings are designed, we can positively impact the health of the population and the planet. The mindful MATERIALS program is creating a market movement that will simplify the material health/product transparency specifications for the A&D community. mindful MATERIALS creates a community between architects, designers, contractors, manufacturers, and owners so that we can all design with intent for the health of our people and our planet.

Visit the ASSA ABLOY mindful MATERIALS page to research Div 08 & 28 products with a variety of sustainability contributions:
